COURSE OVERVIEW

Equipping managers and supervisors with the skills and know-how to evaluate workplace safety systems and implement new Health & Safety control measures.

This 3 day Health & Safety training course is designed for those within Health & Safety management positions or for those with these responsibilities in the workplace.

Each of the 7 modules on this course consist of learning objectives supported with short video clips, interactive activities and links to further reading and additional references.

The course will conclude with a written and practical assessment on day 3.

Following successful completion of the course you will receive an evergreen IOSH Managing Safely certificate.

WHAT'S COVERED

- Introducing Managing Safely
